FINANCIAL STATEMENTS

MESSAGE FROM THE BOARD OF DIRECTORS

SAGICOR POOLED INVESTMENT FUNDS LIMITED

The Directors are pleased to present the Annual Report for Sagicor Pooled Investment Funds Limited for the year ended September 30, 2022.

While FY 2021 saw the market being largely affected by the Covid-19 virus and its spinoff effects, FY 2022 was expected to be a year of global recovery as widespread containment of the virus was on the rise. However, FY 2022 saw financial markets both locally and internationally, observe an immense pullback, as market performance and investment returns for the year were negatively impacted by elevated levels of uncertainty due primarily to geopolitical tensions, high inflation, and high interest rates.

The Total Pooled Pension Funds under Management for the twelve-month period under review declined by 2.2% or J\$3.8B to stand at J\$169.4B when compared to the J\$173.2B recorded the similar period the previous year. Of the nine (9) Pooled Investment Funds, five (5) funds; Pooled Equity, Pooled Fixed Income, Pooled Foreign Currency Indexed, Pooled Consumer Price Index and Pooled Diversified, outperformed their respective benchmarks. Notably, the Pooled Consumer Price Index fund emerged as the top performer with a 12 Month return of 10.6%, representing 140 basis points (bps) spread above inflation which stood at 9.2%. The top three (3) performing funds were rounded out with the Pooled Mortgage and Real Estate Fund in second with a return of 4.3% and Pooled Money Market in third with a return of 3.3%.

“

Of the nine (9) Pooled Investment Funds, five (5) funds outperformed their respective benchmarks.

The twelve-month performance of the Pooled Funds versus benchmarks and the Net Asset Value of each Fund is shown in the table below:

Sagicor Pooled Pension Funds	Invests mainly in	Net Asset Value (\$B)	Performance		Benchmark
			12-Mth Actual	12-Mth Benchmark	
PIF Equity	Listed Stocks	49.3	-8.1%	-12.8%	JSE Main Index
PIF Fixed Income	GOJ Securities (average tenure 10-15 years)	19.6	-3.5%	-17.8%	Weighted Avg 10-15 year GOJ Bond Yield & Inflation
PIF Foreign Currency Indexed	GOJ US & Euro Denominated Fixed Bonds	25.9	-5.0%	-8.2%	JSE Jamaica Global Bond Index & Depreciation
PIF Money Market	GOJ Securities (average tenure not exceeding 5 years)	6.3	3.3%	8.1%	Avg 180 Day Treasury Bill
PIF Mortgage & Real Estate	Hotels, Commercial & warehouse properties	30.9	4.3%	9.2%	Inflation
PIF Consumer Price Index	GOJ Inflation Indexed Bonds	23.6	10.6%	9.2%	Inflation
PIF Global Markets	US\$ Equity & Fixed Income Securities	3.6	1.1%	12.0%	US Inflation & Depreciation
PIF International Equity	Listed securities on International exchanges	7.2	-14.7%	-11.6%	S&P 500 Index & Depreciation
PIF Diversified	Bonds, Equities & Real Estate	12.5	-3.4%	-3.5%	Avg Asset Yields & Inflation

* The total net asset value includes \$9.5 Billion of interfund investments amongst the pooled investment funds.

“

FY 2021/2022 was largely characterized by Central Banks across the globe deviating from a monetary policy stance focused on expansion to one that was focused on containing the persistent rise in inflation.

With inflation increasing rapidly, central banks, notably the US Federal Reserve (Fed) and the Bank of Jamaica (BOJ), implemented a course of rapid interest-rate hikes, which triggered a sharp sell-off across the bond market as well as a drop into bear market territory for stocks. In light of this, as the top investment manager within the space, we have focused strongly on a strategy of realignment of our various portfolios.

Throughout the period under review, inflation emerged the greatest threat to the stability of the economy as well as the performance of the financial market. In view of this, it is our belief that inflation will remain elevated for the short term, however, the likelihood of it surpassing the highest levels seen during FY 2022 remains low, with an expectation of it trending downward over the medium to long term. Contingent on this, Central Banks will likely begin to adjust their current monetary policy actions, which should bear fruit for a recovery of asset prices.

Considering the challenges faced throughout the year and the hurdles to be faced as we journey on our path to recovery, we remain steadfast in our encouragement of financial security for the future. This will continue to be achieved through our skilled and dedicated team who are pleased to serve you and remain devoted to delivering exceptional service and robust investment returns.

We sincerely thank you and look forward to your continued cooperation and unfaltering belief in us, particularly during this turbulent financial climate.

“ *Considering the challenges faced throughout the year and the hurdles to be faced as we journey on our path to recovery, we remain steadfast in our encouragement of financial security for the future.* ”

FY 2021/2022

ECONOMIC PERFORMANCE

While the first quarter of Financial Year (FY) 2022¹ was expected to be the beginning of a year of economic recovery, 2022 saw the global financial landscape continue to be characterised by persistently high inflation. Resultantly, central banks remained steadfast in their utilization of restrictive monetary policy tactics, notably quantitative tightening, and the active management of key policy rates.

In spite of their efforts, inflation remained stubbornly high for the period under review due to headwinds from geopolitical tensions and covid-19 related lockdowns. International energy and commodity prices faced several bouts of uncertainty as the Russia-Ukraine conflict persisted, causing an obstruction of production and trade

of these key inputs. This coupled with China's continued employment of its zero-covid policy, in an effort to combat the recurring waves of the Covid-19 virus within its borders, further impeded the efficiency of global supply chains placing additional upward pressure on prices.

“

During the period both S&P Ratings Agency and Fitch Ratings Agency affirmed Jamaica at B+ with a stable outlook during 2022.

¹FY 2022 – October 1st, 2021 to September 30th, 2022

As the Jamaican economy was not spared from these adverse effects, the Bank of Jamaica (BOJ), in line with other major central banks, opted to enact a series of interest rate hikes aimed at limiting the inflation pass-through effects from our main trading partners. Furthermore, in an attempt to keep the economy stable, the Bank also implemented measures to contain Jamaican dollar liquidity and maintain stability within the foreign exchange market.

Of note, fiscal and monetary strategies developed and executed by the Government of Jamaica (GOJ) and the BOJ prior to and during the period proved effective as both S&P Ratings Agency and Fitch Ratings Agency affirmed Jamaica at B+ with a stable outlook during 2022.

INFLATION

Inflation as indicated by the Consumer Price Index (CPI) for the Twelve (12) Months ended September 2022 stood at 9.2% as a result of higher prices across all thirteen (13) divisions. This represented a 320 basis points (bps) increase over the upper limit of the Bank of Jamaica's (BOJ) target range of 4.0% - 6.0%. This surge in the inflation rate was mainly due to increases across the "Food and Non-Alcoholic Beverages"

division, the "Housing, Water, Electricity, Gas and Fuels" division and the "Restaurants and Accommodations Services" division which account for 35.8%, 17.8% and 6.7% of the CPI basket, respectively. Higher prices for 'Cereal and cereal products' and 'Meat and other parts of slaughtered land animals' contributed significantly to the increase in the "Food and Non-Alcoholic Beverages" division. Additionally, the termination of the GOJ's electricity bill subsidy initiative in August 2022 alongside higher prices for 'meals consumed away from home' contributed to the surge in the "Housing, Water, Electricity, Gas and Fuels" division and the "Restaurants and Accommodations Services" division.

Consequently, the BOJ has remained consistent and unwavering in its efforts to maintain a "low, stable and predictable" inflation environment by enacting a contractionary monetary policy strategy.

INTEREST RATES

Effective October 2021, the Bank of Jamaica raised its benchmark policy rate from its record low of 0.5% by 100 bps to stand at 1.5%, marking the end of its accommodative monetary policy stance amidst the relentless growth in inflation. Since then, the Central Bank raised its policy rate an additional nine (9) times,

12-Month Inflationary Changes

% PERCENTAGE

T-Bill Average Yield

% PERCENTAGE

a cumulative increase of 500 bps, to stand at 6.5% as at September 2022. This action was aimed at reducing the expansion of Jamaican dollar liquidity, as well as, the demand in the economy, therefore, restricting the ability of businesses to pass on price increases to consumers.

This policy action expectedly resulted in a rise in interest rates of all tenors of private money market instruments and yields on GOJ Treasury Bills (T-Bill) all trended upward. Consequently, as at the end of September 2022, the average yield on the 30-Day Certificate of Deposit (CD) as well as the GOJ T-Bills rose relative to the similar period in 2021. The 30-day CD, 90-day T-Bill and 180-day T-Bill average yields closed at 7.41% (up 482 bps), 7.57% (up 616 bps) and 7.96% (up 630 bps), respectively.

FOREIGN EXCHANGE

For the twelve (12) months ended September 2022, the Jamaican Dollar weakened against its US counterpart as the weighted average selling rate closed at J\$152.82:US\$1.00 versus J\$147.24:US\$1:00 as at the similar period the previous year. This upward movement reflected a rate of depreciation of 3.8%. The BOJ maintained its usage of its market intervention tool BFXITT aimed at maintaining stability and reducing any excess demand for foreign currency while limiting

“Despite the high interest rate environment, the ample stock of reserves coupled with the intent to reduce the debt burden has positioned the nation to withstand any possible economic shocks.”

exposure to unwarranted volatility at strategic points throughout the year. With the exception of December 2021, April 2022, June 2022 and August 2022, the Bank sold a total of approximately US\$738.0M to the foreign exchange market, which represented a 102.2% increase relative to the previous year. Additionally, during the year the Bank adjusted its Net Open Position limits for deposit-taking institutions (DTIs) to further ensure the foreign exchange market remained stable.

J\$ vs US\$ Exchange Rate Movements

Of note, Jamaica’s Net International Reserves (NIR) fell by 5.0% as at the end of September 2022 to stand at US\$3.8B when compared to the corresponding period the previous year. This represented approximately twenty-four (24) weeks of Goods and Services imports, which is twice as much as the international benchmark of twelve (12) weeks. Despite the high interest rate environment, the ample stock of reserves coupled with the intent to reduce the debt burden has positioned the nation to withstand any possible economic shocks, mainly the potential slide in the Jamaican Dollar relative to the United States Dollar.

JSE Main Market Movement

JSE Junior Market Movement

STOCK MARKET

The local equity market remained volatile throughout FY 2022 as investors tried to navigate the financial landscape, seeking the most attractive returns. As at the end of September 2022, the Jamaica Stock Exchange (JSE) Main Market Index stood at 361,691.60, representing a 12.8% or 53,198.36 decline relative to the end of September 2021. The JSE Junior Market Index for the same period stood at 4,229.54 as at September 2022, displaying an upsurge of 28.3% or 933.19. The Main Market which houses more stable and mature companies, continued to experience a downturn, as investors, primarily institutional investors, steered clear of the equity space as returns on fixed income assets became more attractive. Be that as it may, the Junior

Market displayed a positive performance, attributed to its composition of growth stocks as well as the abundance of Initial Public Offerings (IPO) throughout the FY; Spur Tree Hill, JFP Limited, Edufocal Limited, Dolla Financial Services Limited and One-on-One Educational Services.

TOURISM

As FY 2022 represented the first full year of total visitor arrivals including cruise passengers given the full reopening of the borders in August 2021, the tourism sector has observed a steady return to normalcy. As at September 2022, the Total Visitor arrivals stood at 2,885,098 visitors representing a 148.0% increase relative to the 1,163,499 visitors registered FY 2021² and a 28.7% relative to FY 2020³.

Of note, the growth in the "Hotels and Restaurant" industry also supported the rebound in the tourism industry. Quarterly Gross Domestic Product for Hotels and Restaurant" industry grew by 79.5% for the Quarter ended December 2021, 107.1% for the quarter ended March 2022, 56.0% for the quarter ended June 2022 and 35.3% for the quarter ended September 2022. This resulted from increased activities in 'Hotels & other short-stay accommodation' and 'Restaurants, bars & canteens.' The performance of 'Hotels & other short-stay accommodation' was positively impacted by a 104.2% increase in foreign national arrivals. A total of 2,133,707 foreign nationals visited the island in FY 2022 compared to 1,044,696 in FY 2021.

GLOBAL MARKETS

FY 2021/2022 was largely characterized by Central Banks across the globe deviating from a monetary policy stance focused on expansion to one that was focused on containing the persistent rise in inflation. As a result, market participants were subjected to higher interest rates. This coupled with the adverse effects of the Russia-Ukraine conflict and Covid-19 related lockdowns in China posed a threat to the performance of many international asset classes.

² FY 2021 – October 1st, 2020 to September 30th, 2021

³ FY 2020 – October 1st, 2019 to September 30th, 2020

Within the equity space, we continued to see the movement between cyclical and defensive stocks as well as growth and value stocks. While the fixed income space realized movement from longer-dated securities to shorter-dated securities in an attempt to mitigate against interest rate risk and inflation risk. Expectedly, the market observed a significant amount of volatility.

In light of this, US Equity indices closed the year down. The S&P 500, Dow Jones Industrial Average and NASDAQ indices closed the year at 3,585.62, 28,725.51 and 10,575.62 respectively, representing downward movement of 16.8%, 15.1% and 26.8%, respectively. In line with US equity, Europe's Euro Stoxx 50 declined by 18.0% and Japan's Nikkei 225 closed 11.9% down. The FTSE 100, however, while it closed in the red, managed to observe the smallest decline of 2.7%.

The US Treasury yields, however, were significantly impacted by the path of inflation resulting in bouts of narrowing and even inversions of the yield curve throughout the year. The 10-year treasury closed FY 2022 234 bps higher than the previous year to stand at 3.83%.

OUTLOOK

In FY 2022 the economic environment was characterized by high inflation, rising interest rates and higher commodity prices owing in part to the conflict between Russia and Ukraine. Inflation, which peaked at 11.8% locally and ended 2022 at 8.8% globally, remains the greatest challenge to economic growth. Whilst inflation is projected to slow gradually during FY 2023 the probability of breach remains high due to ongoing geo-political tension in the economies of major trading partners as well as the war in Ukraine.

Central banks across the world have focused on a tightening monetary policy to contain inflation. The International Monetary Fund (IMF) projects that these methods will help to lower inflation rates to 6.9% in 2023 and further moderate at 4.2% in 2024. The US Federal Reserve, despite slowing its pace of rate rises

in February 2023 have not ruled out the possibility of much sharper increases in the future should it be warranted. The Bank of Jamaica (BoJ) on the other hand responded to two consecutive months of falling inflation by holding its policy rate constant in its latest review. In the absence of further unforeseen shocks, market conditions are likely to improve outwards the end of FY2023 into FY2024.

Of note, Jamaica has observed six (6) consecutive quarters of economic growth as at September 2022 and we anticipate further growth for the nation. This expectation for growth is hinged on the upward trajectory for stopover arrivals coupled with the continued recovery in the economies of Jamaica's main trading partners, a booming construction industry and the normalization of supply chains.

In the short term, we anticipate that the continued rise in interest rates along with potential headwinds from the Ukraine-Russia war will continue to weigh on economic activity and possibly a faster-than expected reopening of the Chinese economy may pose some upside risk to inflation. However, in the long term, we believe that supply chain normalization will be attained, and inflation will trend lower (though in a stubborn manner) thus benefiting both the bond and equity market.

“ Jamaica has observed six (6) consecutive quarters of economic growth as at September 2022 and we anticipate further growth for the nation.

WE CONTINUALLY INNOVATE.
WE NEVER SETTLE FOR A SOLUTION
THAT ONLY MEETS TODAY'S NEEDS
BECAUSE TOMORROW'S CHALLENGES
ARE JUST AROUND THE CORNER.

ADMINISTRATION

It was our pleasure serving you in 2022. Throughout the year, we maintained our focus on innovation as we ramped up our digitization agenda. We also continued to bring to the Trustees, a first world experience in Trustee education, in order to continue creating a positive impact in the lives of our clients, your members and your pensioners. To this end, we are pleased to report the following:

- 1.** We implemented the next phase of our benefit option automation for Defined Contribution (DC) plans. This innovation allows Human Resources Teams to initiate and instantly generate retirement benefit options online for their members via our Sagicor Connect platform. This has provided you and your members with unprecedented service and convenience, as your members are now able to gain immediate access to their benefit options anywhere and any time
- 2.** Sagicor PLUS, our state of the art, cutting-edge biometric solution for proof of life verification, was introduced to your pensioners. This new system replaces our paper-based proof of life certificates which required pensioners to visit a Justice of the Peace. Our digital solution allows your pensioners to instantly verify that they are alive, using our facial recognition technology. We are pleased to be able to provide a safe means for pensioners to do this verification on an annual basis.
- 3.** Through our continued partnership with Find X and LifeWorks, Canada's largest pension administrator fiduciary, we were able to offer Trustees another remarkable and informative virtual training program, continuing the series, "What every Trustee Should Know." This year, a new module was introduced which considered the impact of the Data Protection Act on Pension Plans and Risk-Based Assessments.

Feedback from all the respondents to the post-training survey indicated that the Trustee training program provided information that they need to improve their performance as Trustees and they all agreed that they would recommend the course to other Trustees. We encourage you to enroll in the next cohort, as you continue to empower yourselves to serve as Trustees, for the benefit of your members.

2023 will be a year filled with many opportunities.

1. We intend to kick off our Electronic Voluntary Contributions Campaign. Your members will be encouraged to maximize their pension contributions and reduce their tax bill, while instantly notifying your Human Resources Team of the member's authorization for the payroll deduction.
2. Access will be granted to your Plan's Trust Deed and Rules via our online platform My Sagicor and our app, My Sagicor App. We expect this level of transparency to inspire your members to learn about the many benefits of their pension plan and increase their appreciation of it.
3. Your Human Resources Teams and members of Defined Benefit (DB) Plans will also enjoy the benefits of online termination benefit options, as we continue digitization of our benefit options.
4. We will be upgrading our Annual Member Benefit Statements to take a fresh approach in how we communicate members' benefits, with a view to encouraging behaviours that preserve pensions. For example, we will highlight each member's replacement ratio as well as any gaps in Voluntary contributions, which members can take advantage of. This will assist your members with planning more effectively for their retirement as it will create an opportunity for them to determine where they are now, and what will be required to

replace at least 75% of their salary at retirement, rather than the usual focus on accumulated cash balances, which favour withdrawals/refunds.

5. Your members will also be introduced to our "My Retirement Planner" which will provide a personal roadmap for achieving the best retirement 'day one' possible, in fulfillment of the desire to have members retire with dignity and peace of mind.

As we continue to digitize our operations, we will not lose sight of making a difference in your lives and that of our members. This is at the center of everything we do. We thank you for the exceptional partnership we have enjoyed and the confidence you continue to place in Employee Benefits Administrator Limited as your Administrator of choice, as we remain committed to serving you with distinction and creating a first-class experience for you and your members.

INDEPENDENT AUDITORS' REPORT

To the Trustees of
SAGICOR POOLED PENSION INVESTMENT FUNDS

Opinion

We have audited the financial statements of Sagicor Pooled Pension Investment Funds ("the Funds"), set out on pages 5 to 113, which comprise the statements of financial position as at September 30, 2022, the statements of profit or loss and other comprehensive income and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information of the Funds listed below:

- Pooled Equity Fund
- Pooled Mortgage and Real Estate Fund
- Pooled Fixed Income Fund
- Pooled Foreign Currency Fund
- Pooled Money Market Fund
- Pooled International Equity Fund
- Pooled Global Market Fund
- Pooled Diversified Investment Fund
- Pooled CPI Fund
- Pooled General Fund

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Funds as at September 30, 2022, and of their financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

KPMG, a Jamaican partnership and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

Page 2

INDEPENDENT AUDITORS' REPORT (CONT'D)

To the Trustees of
SAGICOR POOLED PENSION INVESTMENT FUNDS

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Funds in accordance with the International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants including International Independence Standards (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with governance for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Funds or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Funds' financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion.

Page 3

INDEPENDENT AUDITORS' REPORT (CONT'D)

To the Trustees of
SAGICOR POOLED PENSION INVESTMENT FUNDS

Auditors' Responsibilities for the Audit of the Financial Statements (cont'd)

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Funds to cease to continue as a going concern.

Page 4

INDEPENDENT AUDITORS' REPORT (CONT'D)

To the Trustees of
SAGICOR POOLED PENSION INVESTMENT FUNDS

Auditors' Responsibilities for the Audit of the Financial Statements (cont'd)

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

A handwritten signature in blue ink that reads 'KPMG'.

Cash at end of the year	<u>302,561</u>	<u>30,569</u>

The accompanying notes form an integral part of the financial statements.

Notes to the Financial Statements

Year ended September 30, 2022

1. Identification and activity

- (a) Sagicor Life Jamaica Limited contracts with the Trustees of pension plans to provide investment and administration services on a pooled basis. Sagicor Life Jamaica Limited is a wholly owned subsidiary of Sagicor Financial Corporation Limited, a company domiciled in Barbados.

The investments are made through the following “Pooled Funds”:

	<u>Pages</u>
(i) Pooled Equity Fund	5
(ii) Pooled Mortgage and Real Estate Fund	8
(iii) Pooled Fixed Income Fund	11
(iv) Pooled Foreign Currency Fund	14
(v) Pooled Money Market Fund	17
(vi) Pooled International Equity Fund	20
(vii) Pooled Global Market Fund	23
(viii) Pooled Diversified Investment Fund	26
(ix) Pooled CPI Fund	29

Administrative functions of the above funds are processed through the General Fund (page 32).

- (b) Deposits received from Trustees are accounted for on a cash basis. These deposits are allocated between the Pooled Funds in proportions specified in writing by the Trustees and/or Sagicor Life Jamaica Limited.
- (c) The investment portfolios for the Pooled Funds are selected by Sagicor Life Jamaica Limited in accordance with the investment policies for the Funds, as approved by the Boards of Directors of Sagicor Life Jamaica Limited and Sagicor Pooled Investment Funds Limited.
- (d) Sagicor Pooled Investment Funds Limited is a wholly owned subsidiary of Sagicor Life Jamaica Limited. The company was established to undertake and perform the office and duties of trustees, custodian trustees, attorney or nominee of or for any pension scheme (or any pension or trust funds connected thereto) in respect to business carried on by Sagicor Life Jamaica Limited as fund manager in the management and investment of pension funds and other trusts.
- (e) Investments made by the Funds are registered as follows:

Pooled Equity Fund]	Securities of these Funds
Pooled Mortgage and Real Estate Fund]	are registered in the name of Sagicor
Pooled Fixed Income Fund]	Pooled Investment Funds Limited
Pooled Foreign Currency Fund]	which holds the assets as nominees for
Pooled Money Market Fund]	the trustees of the pension funds.
Pooled International Equity Fund]	Investments in these Funds are
Pooled Global Market Fund]	registered in the name of the Funds as
Pooled Diversified Investment Fund]	nominees for the trustees of the pension
Pooled CPI Fund]	funds.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

1. Identification and activity (cont'd)

- (f) Sagicor Life Jamaica Limited allocates units to pension plans based on net investment in the Funds. Unit values are calculated by dividing the value of the net assets of each Fund by the number of units in that investment Fund on the valuation date.

2. Basis of preparation

- (a) Statement of compliance

The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board.

New and amended standards that became effective during the year

Certain new and amended standards came into effect during the current financial year. The Funds' Administrator has assessed them and has adopted those which are relevant to its financial statements.

New and amended standards and interpretations that are not yet effective:

At the date of authorisation of these financial statements, certain new and amended standards and interpretations have been issued which were not effective for the current year and which the company has not early-adopted. The Funds' Administrator has assessed them with respect to its operations and has determined that the following are relevant:

- Amendments to IAS 37 *Provision, Contingent Liabilities and Contingent Assets* is effective for annual periods beginning on or after January 1, 2022 and clarifies those costs that comprise the costs of fulfilling the contract.

The amendments clarify that the 'costs of fulfilling a contract' comprise both the incremental costs – e.g. direct labour and materials; and an allocation of other direct costs – e.g. an allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract. This clarification will require entities that apply the 'incremental cost' approach to recognise bigger and potentially more provisions. At the date of initial application, the cumulative effect of applying the amendments is recognised as an opening balance adjustment to retained earnings or other component of equity, as appropriate. The comparatives are not restated.

- Amendments to IAS 1 *Presentation of Financial Statements*, will apply retrospectively for annual reporting periods beginning on or after 1 January 2023. The amendments promote consistency in application and clarify the requirements on determining if a liability is current or non-current.

Under existing IAS 1 requirements, entities classify a liability as current when they do not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. As part of its amendments, the requirement for a right to be unconditional has been removed and instead, now requires that a right to defer settlement must have substance and exist at the end of the reporting period.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

2. Basis of preparation (cont'd)

(a) Statement of compliance (cont'd)

New and amended standards and interpretations that are not yet effective (cont'd):

- Amendments to IAS 1 *Presentation of Financial Statements* (cont'd)

An entity classifies a liability as non-current if it has a right to defer settlement for at least twelve months after the reporting period. It has now been clarified that a right to defer exists only if the entity complies with conditions specified in the loan agreement at the end of the reporting period, even if the lender does not test compliance until a later date.

With the amendments, convertible instruments may become current. In light of this, the amendments clarify how an entity classifies a liability that includes a counterparty conversion option, which could be recognised as either equity or a liability separately from the liability component under IAS 32. Generally, if a liability has any conversion options that involve a transfer of the entity's own equity instruments, these would affect its classification as current or non-current. It has now been clarified that an entity can ignore only those conversion options that are recognised as equity when classifying liabilities as current or non-current.

- Amendments to IAS 1 *Presentation of Financial Statements* are effective for annual periods beginning on or after January 1, 2023 and may be applied earlier. The amendments help companies provide useful accounting policy disclosures.

The key amendments to IAS 1 include:

- requiring companies to disclose their *material* accounting policies rather than their *significant* accounting policies;
- clarifying that accounting policies related to immaterial transactions, other events or conditions are themselves immaterial and as such need not be disclosed; and
- clarifying that not all accounting policies that relate to material transactions, other events or conditions are themselves material to a company's financial statements.

The amendments are consistent with the refined definition of material:

"Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements".

- Amendments to IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* are effective for periods beginning on or after January 1, 2023, with early adoption permitted. The amendments introduce a new definition for accounting estimates: clarifying that they are monetary amounts in the financial statements that are subject to measurement uncertainty.

The amendments also clarify the relationship between accounting policies and accounting estimates by specifying that an entity develops an accounting estimate to achieve the objective set out by an accounting policy.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

2. Basis of preparation (cont'd)

(a) Statement of compliance (cont'd)

New and amended standards and interpretations that are not yet effective (cont'd):

- Amendments to IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors (continued)*

Developing an accounting estimate includes both:

- selecting a measurement technique (estimation or valuation technique) – e.g. an estimation technique used to measure a loss allowance for expected credit losses when applying IFRS 9 *Financial Instruments*; and
- choosing the inputs to be used when applying the chosen measurement technique – e.g. the expected cash outflows for determining a provision for warranty obligations when applying IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*.

The effects of changes in such inputs or measurement techniques are changes in accounting estimates.

The Funds' Administrator does not expect the amendments to have a significant impact on its future financial statements.

(b) Basis of preparation and functional currency

The financial statements are presented in Jamaica dollars which is the functional currency of the Funds. The financial statements are presented in thousands of Jamaica dollars unless otherwise stated. The financial statements are prepared under the historical cost convention except for investments measured at fair value.

(c) Use of estimates and judgements

The preparation of the financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the reported amount of assets and liabilities, contingent assets and contingent liabilities at the reporting date and income and expenses for the year then ended. Actual amounts could differ from these estimates.

The estimate and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

Judgements that have a significant effect on the financial statements are made by management in the application of IFRS. Estimates with a significant risk of material adjustment in the next financial year are in respect to the fair value of investments as discussed in note 3(j).

(a) Cash

For the purpose of the cash flow statements, cash comprises cash in hand and at bank and bank overdrafts that form an integral part of the Funds' cash management activities and are included as a component of cash. Cash is measured at amortised cost.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

3. Significant accounting policies (cont'd)

(b) Accounts receivable

Accounts receivable are measured at amortised cost less impairment losses.

(c) Accounts payable

Accounts payable are measured at amortised cost.

(d) Investments

All investments are classified as fair value through profit and loss. These are so designated by management at inception, since the assets form part of managed portfolios whose performance is evaluated on a fair value basis, in accordance with a documented investment strategy. These investments are measured initially at cost and are subsequently re-measured at their fair value based on quoted prices or other valuation techniques. Realised and unrealised gains and losses are recorded in profit or loss.

Valuation technique and significant unobservable inputs

The valuation techniques used in measuring fair values, as well as the significant unobservable inputs used are as follows:

Investments

Method

Government of Jamaica

Determined by reference to quoted market prices where available. If quoted market prices are not available, then fair value is determined by pricing models or other recognised valuation techniques.

Quoted equity

Based on the year end quoted bid price holdings published by the respective stock exchanges and brokers.

Unit trust and Pooled Funds

Based on pricing information received from the relevant fund manager.

Unquoted equity

Based on pricing information received from relevant brokers or other recognised valuation techniques.

Corporate Bonds

Based on prices quoted by relevant brokers or other recognised valuation techniques.

Leases

Determined by amortising the costs over the period of the leases, which approximates the net present value of future cash flows.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

3. Significant accounting policies (cont'd)

(d) Investments (cont'd)

Valuation technique and significant unobservable inputs (cont'd)

The valuation techniques used in measuring fair values, as well as the significant unobservable inputs used are as follows (cont'd):

Investments	Method
Reverse repurchase agreements/deposits	Considered to approximate carrying value in view of the relatively short-term nature of these instruments.
Investment property	Held either to earn rental income or for capital appreciation or for both. All the investment properties are initially measured at cost and subsequently at fair value using the market value approach with any change therein recognised in the statement of profit or loss and other comprehensive income. See note 7(d).

(e) Impairment

The Funds recognise loss allowances for expected credit loss (ECLs) on financial assets measured at amortised cost.

The Funds measure loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at the reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Funds consider reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Funds' historical experience and informed credit assessment and including forward-looking information.

The Funds assume that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Funds consider a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Fund in full, without recourse by the Fund to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

The Funds consider a financial asset to have low credit risk when the credit rating of the counterparty is equivalent to the globally understood definition of 'investment grade'.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

3. Significant accounting policies (cont'd)

(e) Impairment (cont'd)

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Fund is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Fund expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Funds assess whether financial assets carried at amortised cost are credit impaired.

A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 90 days past due;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation or;
- the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECLs in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-off

The gross carrying amount of a financial asset is written off when the Fund has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

(f) Foreign currency transactions

Foreign currency balances at the reporting date are translated at the rates of exchange ruling on that date.

Transactions in foreign currencies are converted at the rates of exchange ruling at the dates of those transactions.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

3. Significant accounting policies (cont'd)

(f) Foreign currency transactions (cont'd)

Gains/(losses) are included in the net appreciation/(depreciation) of investments in profit or loss.

(g) Revenue recognition

Dividend income is recognised in profit or loss when the right to receive income is established.

Interest income is recognised in profit or loss for using the effective interest method. The “effective interest rate” is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial instruments to its gross carrying amount.

When calculating the effective interest rate for financial instruments, the Funds estimates future cash flows considering all contractual terms of the financial instrument, but not ECL. Interest received or receivable are recognised in profit or loss as interest income.

Interest received or receivable are recognised in profit or loss as interest income.

(h) Related parties

A related party is a person or entity that is related to the entity that is preparing its financial statements (referred to in IAS 24 *Related Party Disclosures* as the “reporting entity” in this case, the Funds).

(a) A person or a close member of that person’s family is related to the Funds if that person:

- (i) Has control or joint control over the Funds;
- (ii) Has significant influence over the Funds; or
- (ii) Is a member of the key management personnel of the Funds or of a parent of the Funds.

(b) An entity is related to the Funds if any of the following conditions applies:

- (i) The entity and the Funds are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
- (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
- (iii) Both entities are joint ventures of the same third party.
- (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

3. Significant accounting policies (cont'd)

(h) Related parties (cont'd)

(b) An entity is related to the Funds if any of the following conditions applies (cont'd):

- (v) The entity is a post-employment benefit plan for the benefit of employees of either the Funds or an entity related to the Funds.
- (vi) The entity is controlled, or jointly controlled by a person identified in (a).
- (vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).
- (viii) The entity or any member of a group of which it is a part, provides key management personnel services to the Funds, or the parent of the Funds.

A related party transaction is a transfer of resources, services or obligations between related parties, regardless of whether a price is charged.

The Funds' key related party relationships are with:

- Sagicor Financial Corporation Limited
- Sagicor Life Jamaica Limited (fund manager)
- Sagicor Investments Jamaica Limited
- Sagicor Life of the Cayman Islands Limited
- Sagicor Property Services Limited
- Sagicor Re Insurance Limited (Cayman)
- Employee Benefits Administrator Limited
- Sagicor Bank Jamaica Limited
- Sagicor Real Estate X Fund Limited
- X Fund Properties Limited
- Segregated Funds managed by Sagicor Life Jamaica Limited
- Sagicor Sigma Funds managed by Sagicor Life Jamaica Limited
- The Trustees of the individual pension plans
- Sagicor Life Cayman Segregated Funds managed by Sagicor Life of Cayman Islands Limited

All transactions with related parties are at arm's length, see disclosures relating to transactions with related parties at note 5.

(i) Financial instruments

A financial instrument is any contract that gives rise to both a financial asset of one enterprise and a financial liability or equity instrument of another enterprise. For the purposes of the financial statements, financial assets have been determined to include investments, cash and cash equivalents, accounts receivable, related party and inter-fund balances. Similarly, financial liabilities include accounts payable, related party and inter-fund balances.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

3. Significant accounting policies (cont'd)

(i) Financial instruments (cont'd)

(i) Classification and subsequent measurement

On initial recognition, the Funds classifies financial assets as measured at amortised cost or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI).

All other financial assets of the Funds are measured at FVTPL or amortised cost.

Business model assessment:

The Funds make an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Funds' management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how the investment manager is compensated: e.g, whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

The Funds have determined that it has two business models.

- Held to collect business model: this includes cash and cash equivalents, contributions and dividend receivable and other receivables. These financial assets are held to collect contractual cash flow.
- Other business model: This includes debt securities, units in unit trusts, units in pooled funds and equity investments. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

3. Significant accounting policies (cont'd)

(i) Financial instruments (cont'd)

(i) Classification and subsequent measurement (cont'd)

Assessment whether contractual cashflows are SPPI

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Funds consider the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Funds consider the following:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- leverage features, that modify consideration of the time value of money such as periodic reset of interest rates;
- prepayment and extension features; and
- terms that limit the Funds' claim to cash flows from specified assets (e.g. non-recourse features).

Financial liabilities

All financial liabilities are recognised initially at fair value and subsequently at amortised cost.

(ii) Derecognition

Financial assets

The Funds derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Funds neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

Any interest in transferred financial assets that qualify for derecognition that is created or retained by the Funds are recognised as a separate asset or liability in the statement of financial position.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

3. Significant accounting policies (cont'd)

(i) Financial instruments (cont'd)

(ii) Derecognition (cont'd)

Financial assets (cont'd)

On derecognition of a financial asset, the difference between the carrying amount of the asset or the carrying amount allocated to the portion of the asset derecognised, and the consideration received including any new asset obtained less any new liability assumed is recognised in profit or loss.

Financial liabilities

The Funds derecognises a financial liability when its contractual obligations are discharged or cancelled or expired.

(iii) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Funds currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

(j) Determination of fair value:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Fund has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Funds measure the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are readily and regularly available and represent actual and regularly occurring market transactions on arm's length basis.

If a market for a financial instrument is not active, the Funds establish fair value using a valuation technique. Valuation techniques include using recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially the same and discounted cash flow analyses. The chosen valuation technique makes maximum use of market inputs, relies as little as possible on estimates specific to the Funds, incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Inputs to valuation techniques reasonably represent market expectations and measures of the risk-return factors inherent in the financial instrument. The Fund Manager calibrates valuation techniques and tests them for validity using prices from observable current market transactions in the same instrument or based on other available observable market data.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

3. Significant accounting policies (cont'd)

(j) Determination of fair value (cont'd):

Premiums and discounts, including initial transaction costs, are included in the carrying amount of the related instrument and amortised based on the effective interest rate of the instrument.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price, i.e., the fair value of the consideration given or received, unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument (i.e., without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets. When a transaction price provides the best evidence of fair value at initial recognition, the financial instrument is initially measured at the transaction price and any difference between this price and the value initially obtained from a valuation model is subsequently recognised in surplus or deficit on an appropriate basis over the life of the instrument.

All changes in fair value, other than interest and dividend income and expense, are recognised in profit or loss as net gain from financial instruments at fair value through profit or loss.

4. Financial risk management

The Pooled Investment Funds have exposure to the following risks:

Credit risk
Liquidity risk
Market risk

These notes present information about the Funds' exposure to each of the above risks, the Funds' objectives, policies and processes for measuring and managing risks.

Exposure to these risks is shown in notes relating to each Fund.

Risk management framework

The Board of Directors of Sagicor Life Jamaica Limited is ultimately responsible for the establishment and oversight of the risk management framework for the Funds. The Board has established committees for managing and monitoring risks.

The Pooled Funds have an established risk management framework with clear terms of reference from the Board of Directors of Sagicor Life Jamaica Limited and Sagicor Pooled Investment Funds Limited.

The framework involves the quarterly evaluation of risks by senior management. The strategies used to manage these risks range from cash management policies, asset liability matching guidelines to anti-money laundering and fraud policies.

(a) Credit risk:

Credit risk is the risk of loss arising from a counter-party to a financial contract failing to discharge its obligations. These risks arise primarily on the cash and short-term investments.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

4. Financial risk management (cont'd)

Risk management framework (cont'd)

(a) Credit risk (cont'd):

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the statement of financial position of the respective Funds.

(i) Cash and short-term investments

Cash and short-term investments are held with reputable financial institutions and collateral is not required for such accounts as management regards the institutions as strong.

(ii) Securities

A significant portion of investments is held in various government instruments and Sagicor Sigma Funds. Credit risk is managed by placing limits on the amounts in relation to a single counterparty or group of counterparties. Investment limits are approved by the Board of Directors of Sagicor Life Jamaica Limited in respect of holdings in the various classes or groupings of securities in aggregate and for any single security. Investment policies for the Funds also govern the credit ratings for bonds that can be held by the Funds.

(iii) Related party

The Fund Administrator structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to a single counterparty or group and single related party or group of related counterparties.

(iv) Impairment

Impairment on cash resources, receivables and resale agreements has been measured on a 12-month expected loss basis. The Fund considers that these exposures have low credit risk based on the external credit ratings of the counterparties.

Impairment on cash resources, receivables and resale agreements has been measured on a 12-month expected loss basis. The Fund considers that these exposures have low credit risk based on the external credit ratings of the counterparties.

The Fund Administrator monitors changes in credit risk on these exposures by tracking published external credit ratings of the counterparties. To determine whether published ratings remain up to date and to assess whether there has been a significant increase in credit risk at the reporting date that has not been reflected in the published ratings, the Administrator reviews changes in bond yields, where available.

There has been no change to the Pooled Funds' exposure to credit risk or the manner in which risk is measured.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

4. Financial risk management (cont'd)

Risk management framework (cont'd)

(b) Liquidity risk:

Liquidity risk, also referred to as funding risk, is the risk that the Funds will encounter difficulty in raising funds to meet their commitments. Liquidity risk may result from an inability to sell a financial asset quickly at close to its fair value.

The Funds' approach to managing liquidity is entailed in the liquidity management process.

These include:

- (i) Maintaining a portfolio of highly marketable and diverse assets that can easily be liquidated as protection against any unforeseen cash flow requirements;
- (ii) Optimising return on investments;
- (iii) Managing the concentration and profile of debt maturities.

Prudent liquidity risk management implies maintaining sufficient readily marketable securities, to meet liabilities as they arise. Additionally, the contracts with trustees of pension plans provide withdrawal arrangements to spread the release of funds on termination.

Maturity of contractual liabilities are shown in notes relating to each Fund.

(c) Market risk:

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and equity prices will affect the value of financial instruments and income. The Funds have significant exposure to market risk on their portfolio of investments which could fluctuate based on changes in market prices.

The objective of managing market risk is to manage and control market risk exposure within acceptable parameters, while optimising returns.

Market risk is managed by the fund managers which carry out extensive research and monitor the price movements of financial assets on the local and international markets. Market risks are managed through risk limits approved by the Board of Directors of Sagicor Pooled Investment Funds Limited.

(i) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. Interest-bearing financial assets are primarily represented by Government of Jamaica securities, which have been contracted at fixed and floating interest rates for the duration of the term.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

4. Financial risk management (cont'd)

Risk management framework (cont'd)

(c) Market risk (cont'd):

(i) Interest rate risk (cont'd)

Tables summarising the carrying amounts of interest rate-sensitive financial instruments, based on the earlier of contractual re-pricing or maturity dates are shown in notes relating to each Fund.

(ii) Foreign exchange risk

Foreign exchange risk is the risk that the market value of, or the cash flows from, financial instruments will vary because of exchange rate fluctuations. The Funds are exposed to foreign currency risk due to fluctuations in exchange rates on transactions and balances that are denominated in currencies other than the Jamaica dollar.

The main currency giving rise to this risk is the United States dollar.

Pooled Diversified Investment Fund	106	426	16	63
Pooled Mortgage and Real Estate Fund	8	30	15	61
Pooled CPI Fund	<u>2,856</u>	<u>11,426</u>	<u>110</u>	<u>439</u>

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

4. Financial risk management (cont'd)

Risk management framework (cont'd)

(c) Market risk (cont'd):

(ii) Foreign exchange risk (cont'd)

The analysis assumes that all other variables, in particular, interest rates, remain constant.

At September 30, 2022, the exchange rate was US\$1 to J\$152.0191 (2021: US\$1 to J\$146.3464).

(iii) Equity price risk

Price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market.

A change in the market price would have increased or decreased net income of the respective Funds as follows:

	2022		2021	
	6% \$'000 Increase	6% \$'000 Decrease	5% \$'000 Increase	5% \$'000 Decrease
Pooled Equity Fund	2,777,566	2,777,566	2,539,423	2,539,423
Pooled Foreign Currency Fund	21,781	21,781	13,012	13,012
Pooled Diversified Investment Fund	90,161	90,161	35,020	35,020
Pooled Mortgage and Real Estate Fund	316,638	316,638	199,773	199,773
Pooled Fixed Income Fund	59,770	59,770	26,473	26,473
Pooled Money Market Fund	31,425	31,425	14,409	14,409
Pooled International Equity Fund	<u>413,091</u>	<u>413,091</u>	<u>461,758</u>	<u>461,758</u>

(d) Operational risk:

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Funds' processes, technology and infrastructure, and from the external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards and behaviour. Operational risks arise from the Funds' operations and are faced by all business entities.

The Funds' objective is to manage operational risks so as to balance the avoidance of financial losses and damage to the Funds' reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

4. Financial risk management (cont'd)

Risk management framework (cont'd)

(e) Management of Accumulated Funds:

The Fund Manager's objectives when managing the fund are to safeguard the fund's ability to continue as a going concern in order to provide optimum returns on funds under management. The Board of Directors and responsible senior management of the Fund Manager monitor the return on the funds under management.

The objective is to maintain a strong fund base so as to sustain future growth.

There were no changes to the approach to fund management during the year. Also, the Fund is not exposed to any externally imposed capital requirements.

5. Related party transactions and balances

Transactions with related parties are as follows:

(a) Pension contributions

	2022 \$'000	2021 \$'000
Sagicor Bank Jamaica Limited	367,450	317,292
Sagicor Life Jamaica Limited	1,064,522	1,092,747
The Advantage General Insurance Company Limited	<u>214,074</u>	<u>1,010,214</u>
	<u>1,646,046</u>	<u>2,420,253</u>

(b) Investment management and administration fees

Sagicor Life Jamaica Limited charges investment and administration fees to clients of the Sagicor Pooled Pension Investment Funds. Investment management and administration fees deducted are disclosed in profit or loss of the respective Funds.

Investment management and administration fees paid to Sagicor Life Jamaica Limited and Employee Benefits Administrator Limited are as follows:

	2022 \$'000	2021 \$'000
Pooled Equity Fund	448,154	450,015
Pooled Mortgage and Real Estate Fund	223,384	194,348

(c) Securities purchased under agreements to resell

The Fund entered into reverse repurchase agreements collateralised by the Government of Jamaica Bonds and other securities. These agreements may result in credit exposure in the event that the counterparties to these transactions are unable to fulfill their contractual obligations.

The fair value of collateral held pursuant to reverse repurchase agreements approximated the carrying value.

The reverse repurchase agreements as at September 30, 2022 was \$43,145,000 (2021: \$105,957,000).

September 30, 2021				
Financial assets	<u>3</u>	<u>-</u>	(<u>3</u>)	<u>-</u>

(i) Fair values of financial instruments

The Fund measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1 - fair value measured based on quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - fair value measurement includes inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - fair value measurement includes inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no transfers between levels during the year.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

6. Notes to the Pooled Equity Fund [pages 5 – 7] (cont'd)

(i) Fair values of financial instruments (cont'd)

The values derived from applying these techniques are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. The following methods and assumptions have been used:

- (a) the fair value of liquid assets and other assets maturing within one year is assumed to approximate their carrying amount. This assumption is applied to liquid assets and the short-term elements of all other financial assets and liabilities; and
- (b) the fair value of variable rate financial instruments is assumed to approximate their carrying amounts.

Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets, however, including their levels in the fair value hierarchy. It does not include fair value information for financial assets not measured at fair value if the carrying amount are a reasonable approximation of fair value due to the short term nature of these financial assets, which are all considered to be within the level two fair value hierarchy.

2022				
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
	<u>\$'000</u>	<u>\$'000</u>	<u>\$'000</u>	<u>\$'000</u>
Financial assets measured at fair value:				
Quoted equities	45,379,277	-	-	45,379,277
Government of Jamaica Securities	-	372	-	372

6. Notes to the Pooled Equity Fund [pages 5 – 7] (cont'd)

(i) Fair values of financial instruments (cont'd)

Reconciliation of Level 3 fair values

The following table shows a reconciliation from the opening balances to the closing balances for level 3 fair value:

	2022 \$'000	2021 \$'000
Balance as at October 1	1,220,434	1,247,928
Net change in fair value	(306,950)	(27,494)
Balance as at September 30	<u>913,484</u>	<u>1,220,434</u>

Sensitivity to significant unobservable inputs movements:

For the fair values of Level 3 instruments, a 6% increase or 6% decrease (2021: 5% increase or 5% decrease) of the equity price would have increase or decrease net income by \$55,000,000 (2021 \$61,000,000).

7. Notes to the Pooled Mortgage and Real Estate Fund [pages 8 – 10]

(a) Securities purchased under agreements to resell

The Fund entered into reverse repurchase agreements collateralised by the Government of Jamaica Bonds and other securities. These agreements may result in credit exposure in the event that the counterparties to these transactions are unable to fulfill their contractual obligations.

The fair value of collateral held pursuant to reverse repurchase agreements approximates the carrying value.

The reverse repurchase agreements as at September 30, 2022 was \$15,720,000 (2021: \$309,701,000).

(b) Sagicor Sigma Global Funds

	<u>15,423,220</u>	<u>14,519,579</u>

* This represents investment in units at the Jewel Grande Montego Bay, from which rental income will be earned. The Jewel Grande was opened for business in September 2021. The property is valued every year by an independent professional valuator. Valuation of property, which is located at Rose Hall, St. James was performed by Allison, Pitter & Co. an independent professional valuator, on July 17, 2022, at which time the asset was valued at \$13,083,220,000. There was no significant change in the fair value of the property from the valuation date to the reporting date.

** The valuation of this property which is located at Lot 17, Dominica Drive, New Kingston was performed by Allison, Pitter & Co. an independent professional valuator, on October 6, 2022, for the period ended September 30, 2022, at which time the asset was valued at \$2,200,000,000. There was no significant change in the fair value of the property from the valuation date to the reporting date.

*** The valuation of this property, which is located at 6b Manchester Avenue, May Pen, Clarendon was performed by Allison, Pitter & Co. an independent professional valuator, on September 29, 2022 at which time the asset was valued at \$140,000,000,000. There was no significant change in the fair value of the property from the reporting date and the valuation date.

The fair value of investment properties of \$15,423,220,000 (2021: \$14,510,579,000) has been categorised as level 3 in the fair value hierarchy.

The following table shows the valuation technique used in measuring fair value as well as the significant unobservable inputs used.

Valuation techniques	Significant unobservable inputs	Inter-relationship between key unobservable inputs and fair value measurement
<p>Market approach. This model takes into account:</p> <ul style="list-style-type: none"> A willing seller and buyer; A reasonable period in which to negotiate a sale, taking into account the nature of the property and state of the market; 	<ul style="list-style-type: none"> Judgements if the property can be sold, exchanged, transferred, let, mortgaged or used for any other economic activity, within its use class. The potential rental value of the property in the current investment climate. 	<p>The estimated fair value would increase/(decrease) if:</p> <ul style="list-style-type: none"> the potential rental value of the property increased/ decreased. judgement about what the property can be sold, exchanged, let, mortgaged, which had been determined to be better/(worse).

Interest rate sensitivity gap	<u>15,152,563</u>	<u>316,180</u>	<u>-</u>	<u>-</u>	<u>-</u>	<u>14,836,383</u>
Cumulative gap	<u>15,152,563</u>	<u>316,180</u>	<u>316,180</u>	<u>316,180</u>	<u>316,180</u>	<u>15,152,563</u>

At the reporting date, the interest profile of the Fund's interest-bearing financial instruments was as follows:

	<u>2022</u> \$'000	<u>2021</u> \$'000
Fixed rate instruments		
Financial assets	<u>15,720</u>	<u>309,701</u>

Sensitivity analysis

A change of basis points outlined below in interest rates and yields:

Currency	<u>Increase</u> <u>in basis point</u>		<u>Decrease</u> <u>in basis point</u>	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
JMD	200	300	50	50
USD	<u>200</u>	<u>100</u>	<u>50</u>	<u>100</u>

A change in basis points would have increased or decreased net income and accumulated fund by the amounts shown below. The analysis assumes that all other variables, particularly foreign currency rates, remain constant. As at September 30, 2022 there were no variable rate instruments.

(i) Fair values of financial instruments

The Fund measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1 - fair value measured based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

7. Notes to the Pooled Mortgage and Real Estate Fund [pages 8 – 10] (cont'd)

(i) Fair values of financial instruments (cont'd)

- Level 2 - fair value measurement includes inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - fair value measurement includes inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no transfers between levels during the year.

The values derived from applying these techniques are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. The following methods and assumptions have been used:

- the fair value of liquid assets and other assets maturing within one year is assumed to approximate their carrying amount. This assumption is applied to liquid assets and the short-term elements of all other financial assets and liabilities; and
- the fair value of variable rate financial instruments is assumed to approximate their carrying amounts.

Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets, including their levels in the fair value hierarchy. It does not include fair value information for financial assets such as securities purchased under agreement to resell because the carrying amount is a reasonable approximation of fair value due to the short-term nature of these financial assets, which are all considered to be within the level two fair value hierarchy.

Interest rate risk (cont'd)

Sensitivity analysis

A change of basis points outlined below in interest rates and yields:

Currency	Increase in basis point		Decrease in basis point	
	2022	2021	2022	2021
JMD	200	300	50	50
USD	<u>200</u>	<u>100</u>	<u>50</u>	<u>100</u>

A change in basis points would have increased or decreased net income and accumulated fund by the amounts shown below. The analysis assumes that all other variables, particularly foreign currency rates, remain constant. The analysis was performed on the same basis as in 2021.

	Increase		Decrease	
	Effect of change in net income \$'000	Effect of change in fair value \$'000	Effect of change in net income \$'000	Effect of change in fair value \$'000
September 30, 2022				
Financial assets	<u>9,353</u>	<u>(1,567,182)</u>	<u>(2,338)</u>	<u>450,512</u>
	Increase		Decrease	
	Effect of change in interest rate \$'000	Effect of change in fair value \$'000	Effect of change in interest rate \$'000	Effect of change in fair value \$'000
September 30, 2021				
Financial assets	<u>18,935</u>	<u>(2,949,844)</u>	<u>(18,935)</u>	<u>596,254</u>

(l) Fair value of financial instruments

The Fund measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1 - fair value measured based on quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - fair value measurement includes inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

8. Notes to the Pooled Fixed Income Fund [pages 11 – 13] (cont'd)

(l) Fair value of financial instruments (cont'd)

- Level 3 - fair value measurement includes inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no transfers between levels during the year.

The values derived from applying these techniques are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. The following methods and assumptions have been used:

- the fair value of liquid assets and other assets maturing within one year is assumed to approximate their carrying amount. This assumption is applied to liquid assets and the short-term elements of all other financial assets and liabilities; and
- the fair value of variable rate financial instruments is assumed to approximate their carrying amounts.

Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets, including their levels in the fair value hierarchy.

It does not include fair value information for financial assets such as securities purchased under agreements to resell because the carrying amount is a reasonable approximation of fair value due to the short term nature of these financial assets, which are all considered to be within the level two fair value hierarchy.

	2022			
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

8. Notes to the Pooled Fixed Income Fund [pages 11 – 13] (cont'd)

(l) Fair value of financial instruments (continued)

Reconciliation of Level 3 fair values

The following table shows a reconciliation from the opening balances to the closing balances for level 3 fair value:

	2022 \$'000	2021 \$'000
Balance as at October 1	374,130	350,000
Net change in fair value	<u>5,152</u>	<u>24,130</u>
Balance as at September 30	<u>379,282</u>	<u>374,130</u>

Sensitivity to significant unobservable inputs movements:

For the fair values of Level 3 instruments, a 6% increase or 6% decrease (5% increase or 5% decrease) of the equity price would have increase or decrease net income by \$22,800,000 (2021:18,700,000).

9. Notes to the Pooled Foreign Currency Fund [pages 14 - 16]

Within 1 year	<u>10,389</u>	<u>10,002</u>
---------------	---------------	---------------

(d) Securities purchased under agreements to resell

The Fund entered into reverse repurchase agreements collateralised by the Government of Jamaica Bonds and other securities. These agreements may result in credit exposure in the event that the counterparties to these transactions are unable to fulfil their contractual obligations.

The fair value of collateral held pursuant to reverse repurchase agreements approximated the carrying value. The reverse repurchase agreements as at September 30, 2022 was \$155,624,000 (2021: \$407,268,000)

Sensitivity analysis

A change of basis points outlined below in interest rates and yields:

Currency	Increase in basis point		Decrease in basis point	
	2022	2021	2022	2021
JMD	200	300	50	50
USD	200	100	50	100

A change in basis points would have increased or decreased net income and accumulated fund by the amounts shown below. The analysis assumes that all other variables, particularly foreign currency rates, remain constant. The analysis was performed on the same basis as in 2021.

	Increase		Decrease	
	Effect of change in net income	Effect of change in fair value	Effect of change in net income	Effect of change in fair value
	\$'000	\$'000	\$'000	\$'000
September 30, 2022				
Financial assets	3,112	(1,066,203)	(778)	308,813
September 30, 2021				
Financial assets	-	(2,277,174)	-	476,175

(k) Fair value of financial instruments

The Fund measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1 - fair value measured based on quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - fair value measurement includes inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - fair value measurement includes inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no transfers between levels during the year.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

9. Notes to the Pooled Foreign Currency Fund [pages 14 - 16] (cont'd)

(k) Fair value of financial instruments (cont'd)

The values derived from applying these techniques are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. The following methods and assumptions have been used:

- (a) the fair value of liquid assets and other assets maturing within one year is assumed to approximate their carrying amount. This assumption is applied to liquid assets and the short-term elements of all other financial assets and liabilities; and
- (b) the fair value of variable rate financial instruments is assumed to approximate their carrying amounts.

Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets including their levels in the fair value hierarchy. It does not include fair value information for financial assets such as securities purchased under agreements to resell because the carrying amount is a reasonable approximation of fair value due to the short term nature of these financial assets, which are all considered to be within the level two fair value hierarchy.

9. Notes to the Pooled Foreign Currency Fund [pages 14 - 16] (cont'd)

(k) Fair value of financial instruments (cont'd)

Reconciliation of Level 3 fair values

The following table shows a reconciliation from the opening balances to the closing balances for level 3 fair value:

	2022 \$'000	2021 \$'000
Balance as at October 1	128,063	100,000
Net change in fair value	<u>6,096</u>	<u>28,063</u>
Balance as at September 30	<u>134,159</u>	<u>128,063</u>

Sensitivity to significant unobservable inputs movements:

For the fair values of Level 3 instruments, a 6% increase or 6% decrease (5% increase or 5% decrease) of the equity price would have increase or decrease net income by \$3,068,000 (2021: 6,400,000).

(c) Securities purchased under agreements to resell

The Fund entered into reverse repurchase agreements collateralised by the Government of Jamaica Bonds and other securities. These agreements may result in credit exposure in the event that the counterparties to these transactions are unable to fulfill their contractual obligations. The fair value of collateral held pursuant to reverse repurchase agreements approximated the carrying value.

The reverse repurchase agreements as at September 30, 2022 was \$265,408,000 (2021: \$261,689,000).

(d) Accounts receivable

	2022 \$'000	2021 \$'000

(f) Financial instruments (cont'd)

(iii) Market risk (cont'd):

Interest rate risk (cont'd):

At the reporting date, the interest profile of the Funds' interest-bearing financial instruments was as follows:

	2022 \$'000	2021 \$'000
Fixed rate instruments		
Financial assets	<u>1,993,392</u>	<u>2,623,351</u>
Variable rate instruments		
Financial assets	<u>541,531</u>	<u>438,370</u>

Sensitivity analysis

A change of basis points outlined below in interest rates and yields:

Currency	Increase in basis point		Decrease in basis point	
	2022	2021	2022	2021
JMD	200	300	50	50
USD	<u>200</u>	<u>100</u>	<u>50</u>	<u>100</u>

A change in basis points would have increased or decreased net income and accumulated fund by the amounts shown below. The analysis assumes that all other variables, particularly foreign currency rates, remain constant. The analysis was performed on the same basis as in 2021.

	Increase		Decrease	
	Effect of change in net income \$'000	Effect of change in fair value \$'000	Effect of change in net income \$'000	Effect of change in fair value \$'000
September 30, 2022				
Financial assets	<u>15,969</u>	<u>(45,869)</u>	<u>(3,992)</u>	<u>(11,801)</u>
September 30, 2021				
Financial assets	<u>4,384</u>	<u>(87,973)</u>	<u>(4,384)</u>	<u>(15,433)</u>

(g) Fair value of financial instruments

The Fund measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1 - fair value measured based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

10. Notes to the Pooled Money Market Fund [pages 17 - 19] (cont'd)

(g) Fair value of financial instruments (cont'd)

- Level 2 - fair value measurement includes inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - fair value measurement includes inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no transfers between levels during the year.

The values derived from applying these techniques are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. The following methods and assumptions have been used:

- (a) the fair value of liquid assets and other assets maturing within one year is assumed to approximate their carrying amount. This assumption is applied to liquid assets and the short-term elements of all other financial assets and liabilities; and
- (b) the fair value of variable rate financial instruments is assumed to approximate their carrying amounts.

Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets including their levels in the fair value hierarchy. It does not include fair value information for financial assets such as securities purchased under agreement to resell because the carrying amount is a reasonable approximation of fair value due to the short term nature of these financial assets which are all considered to be within the level two fair value hierarchy.

(c) Securities purchased under agreements to resell

The Fund entered into reverse repurchase agreements collateralised by the Government of Jamaica Bonds and other securities. These agreements may result in credit exposure in the event that the counterparties to these transactions are unable to fulfil their contractual obligations.

The fair value of collateral held pursuant to reverse repurchase agreements approximated the carrying value.

The reverse repurchase agreements as at September 30, 2022 was \$100,930,000 (2021:\$192,670,000).

(d) Accounts receivable

	2022 \$'000	2021 \$'000
Interest and dividend receivable	75	202
Due from broker	<u>22,675</u>	<u>4,868</u>
	<u>22,750</u>	<u>5,070</u>

(e) Accounts payable

	2022 \$'000	2021 \$'000
Accrued audit fees	<u>857</u>	<u>1,049</u>

Financial instruments

(i) Credit risk:

Exposure to credit risk:

The maximum credit exposure, that is, the amount of loss that would be suffered if every counterparty to the Fund's financial assets were to default at once, is represented by the carrying amount of financial assets shown on the statement of financial position, without taking account of any collateral held or other credit enhancements.

11. Notes to the Pooled International Equity Fund [pages 20 - 22] (cont'd)

(f) Financial instruments (cont'd)

(iii) Market risk (cont'd):

Interest rate risk (cont'd)

At the reporting date, the interest profile of the Fund's interest bearing financial instruments was as follows:

	<u>2022</u> \$'000	<u>2021</u> \$'000
Fixed rate instruments		
Financial assets	<u>200,339</u>	<u>314,292</u>
Variable rate instruments		
Financial assets	<u>-</u>	<u>386,385</u>

A change of basis points outlined below in interest rates and yields:

Currency	Increase in basis point		Decrease in basis point	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
JMD	200	300	50	50
USD	<u>200</u>	<u>100</u>	<u>50</u>	<u>100</u>

Sensitivity analysis

A change in basis points would have increased or decreased net income and accumulated fund by the amounts shown below. The analysis assumes that all other variables, particularly foreign currency rates, remain constant. The analysis was performed on the same basis as in 2021.

	Increase		Decrease	
	<u>Effect of change in net income \$'000</u>	<u>Effect of change in fair value \$'000</u>	<u>Effect of change in net income \$'000</u>	<u>Effect of change in fair value \$'000</u>
September 30, 2022				
Financial assets	<u>2,019</u>	<u>(16,444)</u>	<u>(505)</u>	<u>4,830</u>
September 30, 2021				
Financial assets	<u>3,864</u>	<u>(31,894)</u>	<u>(3,864)</u>	<u>6,781</u>

At September 30, 2022, the Fund does not hold any fixed rate financial assets that are subject to material changes in fair value through profit and loss.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

11. Notes to the Pooled International Equity Fund [pages 20 - 22] (cont'd)

(g) Fair value of financial instruments

The Fund measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1 - fair value measured based on quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - fair value measurement includes inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - fair value measurement includes inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no transfers between levels during the year.

The values derived from applying these techniques are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. The following methods and assumptions have been used:

- (a) the fair value of liquid assets and other assets maturing within one year is assumed to approximate their carrying amount. This assumption is applied to liquid assets and the short-term elements of all other financial assets and liabilities; and
- (b) the fair value of variable rate financial instruments is assumed to approximate their carrying amounts.

Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets including their levels in the fair value hierarchy. It does not include fair value information for financial assets such as securities purchased under agreements to resell because the carrying amount is a reasonable approximation of fair value due to the short-term nature of these financial assets, which are all considered to be within the level two fair value hierarchy.

	2022

(d) Securities purchased under agreements to resell

The Fund entered into reverse repurchase agreements collateralised by the Government of Jamaica Bonds and other securities. These agreements may result in credit exposure in the event that the counterparties to these transactions are unable to fulfil their contractual obligations.

The fair value of collateral held pursuant to reverse repurchase agreements approximated the carrying value.

The reverse repurchase agreements as at September 30, 2022 was \$3,562,000 (2021: \$5,825,000).

At the reporting date, the interest profile of the Fund's interest-bearing financial instruments was as follows:

	<u>2022</u> \$'000	<u>2021</u> \$'000
Fixed rate instruments		
Financial assets	<u>828</u>	<u>5,825</u>

Sensitivity analysis

A change of basis points outlined below in interest rates and yields:

Currency	<u>Increase</u> <u>in basis point</u>		<u>Decrease</u> <u>in basis point</u>	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
JMD	200	300	50	50
USD	<u>200</u>	<u>100</u>	<u>50</u>	<u>100</u>

There were no financial assets that were impacted by interest rate sensitivity as at September 30, 2022.

(h) Fair value of financial instruments

The Fund measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1 - fair value measured based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

13. Notes to the Pooled Diversified Investment Fund [pages 26 – 28] (cont'd)

(h) Fair value of financial instruments (cont'd)

- Level 2 - fair value measurement includes inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - fair value measurement includes inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no transfers between levels during the year.

The values derived from applying these techniques are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. The following methods and assumptions have been used:

- the fair value of liquid assets and other assets maturing within one year is assumed to approximate their carrying amount. This assumption is applied to liquid assets and the short-term elements of all other financial assets and liabilities; and
- the fair value of variable rate financial instruments is assumed to approximate their carrying amounts.

Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets and liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value, which are all considered to be within the level two fair value hierarchy.

(d) Securities purchased under agreement to sell

The Fund entered into reverse repurchase agreements collateralised by the Government of Jamaica Bonds and other securities. These agreements may result in credit exposure in the event that the counterparties to these transactions are unable to fulfil their contractual obligations.

The fair value of collateral held pursuant to reverse repurchase agreements approximated the carrying value.

The reverse repurchase agreements as at September 30, 2022 was \$2,506,074,000 (2021: \$330,065,000).

At the reporting date, the interest profile of the Funds' interest-bearing financial instruments was as follows:

	2022 \$'000	2021 \$'000
Fixed rate instruments		
Financial assets	<u>7,836,138</u>	<u>2,897,406</u>
Variable rate instruments		
Financial assets	<u>10,589,952</u>	<u>8,149,672</u>

Sensitivity analysis

A change of basis points outlined below in interest rates and yields:

Currency	Increase in basis point		Decrease in basis point	
	2022	2021	2022	2021
JMD	200	300	50	100
USD	<u>200</u>	<u>100</u>	<u>50</u>	<u>100</u>

A change in basis points would have increased or decreased net income and accumulated fund by the amounts shown below.

The analysis assumes that all other variables, particularly foreign currency rates, remain constant.

(h) Fair value of financial instruments

The Fund measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1 - fair value measured based on quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - fair value measurement includes inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - fair value measurement includes inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no transfers between levels during the year.

The values derived from applying these techniques are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. The following methods and assumptions have been used:

- the fair value of liquid assets and other assets maturing within one year is assumed to approximate their carrying amount. This assumption is applied to liquid assets and the short-term elements of all other financial assets and liabilities; and
- the fair value of variable rate financial instruments is assumed to approximate their carrying amounts.

(h) Fair value of financial instruments (cont'd)

Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets including their levels in the fair value hierarchy. It does not include fair value information for financial assets such as securities purchased under agreements to resell because the carrying amount is a reasonable approximation of fair value due to the short-term nature of these financial assets, which are all considered to be within the level two fair value hierarchy.

15. Notes to the Pooled General Fund [pages 32 – 34]

(a) Accounts receivable

	<u>2022</u>	<u>2021</u>
	\$'000	\$'000
Withholding tax recoverable	55	55
Other receivables	<u>1,018</u>	<u>1,018</u>
	<u>1,073</u>	<u>1,073</u>

(b) Accounts payable

	<u>2022</u>	<u>2021</u>
	\$'000	\$'000
Statutory deductions payable	39	172
Electronic bank transfers not yet allocated and other payables	134,509	134,169
Stale-dated cheques	<u>299,386</u>	<u>151,433</u>
	<u>433,934</u>	<u>285,774</u>

(c) Financial instruments

(i) Credit risk:

Exposure to credit risk

The maximum credit exposure, that is, the amount of loss that would be suffered if every counterparty to the Fund's financial assets were to default at once, is represented by the carrying amount of financial assets shown on the statement of financial position, without taking account of any collateral held or other credit enhancements.

15. Notes to the General Fund [pages 32 – 34] (cont'd)

(c) Financial instruments

(i) Credit risk:

Exposure to credit risk

The maximum credit exposure, that is, the amount of loss that would be suffered if every counterparty to the Fund's financial assets were to default at once, is represented by the carrying amount of financial assets shown on the statement of financial position, without taking account of any collateral held or other credit enhancements.

(ii) Liquidity risk:

The following are the contractual maturities of financial liabilities:

September 30, 2022	Carrying Amount \$'000	Contractual cash flows \$'000	1-3 months \$'000
Inter-fund account	276,720	276,720	276,720
Accounts payable	433,934	433,934	433,934
Due to related party	667	667	667
	<u>711,321</u>	<u>711,321</u>	<u>711,321</u>
September 30, 2021	Carrying Amount \$'000	Contractual cash flows \$'000	1-3 months \$'000
Inter-fund account	512,475	512,475	512,475
Accounts payable	285,774	285,774	285,774
Due to related party	15,683	15,683	15,683
	<u>813,932</u>	<u>813,932</u>	<u>813,932</u>

(iii) Market risk:

Interest rate risk

The following table summarises the carrying amounts of assets and liabilities and to arrive at the Fund's interest rate gap based on the earlier of contractual re-pricing and maturity dates.

September 30, 2022	Carrying Amount \$'000	Within 3 months \$'000	3-12 months \$'000	1-5 years \$'000	>5 years \$'000	Non sensitive \$'000
<u>Assets</u>						
Cash	302,561	302,561	-	-	-	-
Accounts receivable	1,073	-	-	-	-	1,073

(d) Fair value of financial instruments

The Fund measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1 - fair value measured based on quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - fair value measurement includes inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - fair value measurement includes inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Notes to the Financial Statements (Continued)

Year ended September 30, 2022

15. Notes to the General Fund [pages 32 – 34] (cont'd)

(d) Fair value of financial instruments (cont'd)

Accounting classifications and fair values

There were no financial assets and liabilities measured at fair value as the carrying amount of all financial assets and liabilities is a reasonable approximation of the fair value and are all considered to be within the level two fair value hierarchy.
