Sagicor Financial Company Ltd. (TSX: SFC) to Acquire ivari

August 2022
Caution regarding forward-looking information and non-IFRS measures

Non-IFRS Measures

The Company reports certain non-IFRS measures that are used to evaluate the performance of its businesses and the performance of their respective segments. As non-IFRS measures generally do not have a standardized meaning, they may not be comparable to similar measures presented by other issuers. Securities regulators require such measures to be clearly defined and reconciled with their most comparable IFRS measure.

The Company references non-IFRS measures and insurance industry metrics in this document and elsewhere. Non-IFRS measures are not recognized measures under IFRS and do not have a standardized meaning prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other companies. Rather, these are provided as additional information to complement those IFRS measures by providing further understanding of the results of the operations of the Company from management’s perspective. Accordingly, these measures should not be considered in isolation, nor as a substitute for analysis of the Company’s financial information reported under IFRS. Non-IFRS measures used to analyze the performance of the Company’s businesses include but are not limited to: return on shareholders’ equity, book value per share, debt to capital ratio, total capital and Minimum Continuing Capital and Surplus Requirements. Please see the “Non-IFRS Financial Information” section of Sagicor’s Q2 2022 MD&A as filed on SEDAR, which is incorporated by reference herein, and the discussion below for information regarding these non-IFRS measures.

Book value and book value per share (BVPS): To determine the book value per share, shareholders’ equity is divided by the number of shares outstanding at the period end, net of any treasury shares. Book value is shareholders’ equity. All components of this measure are IFRS measures.

Debt to capital ratio: The debt to capital ratio is the ratio of notes and loans payable (refer to note 16 to the 2021 audited consolidated financial statements) to total capital (excluding participating accounts), where capital is defined as the sum of notes and loans payable and total equity excluding participating accounts. This ratio measures the proportion of debt the Company uses to finance its operations as compared with its capital.

Total capital: This measure provides an indicator for evaluating the Company’s performance. Total capital is the sum of shareholders’ equity, notes and loans payable and non-controlling interest. This measure is the sum of several IFRS measures.

Minimum Continuing Capital and Surplus Requirements (MCCSR): The MCCSR is a capital adequacy measure for life insurance companies that was previously utilized by the Office of the Superintendent of Financial Institutions of Canada. It was used to monitor insurers maintaining adequate capital to meet their financial obligations, with 150% being the minimum standard that was recommended by the Canadian regulator when it was in effect; insurance companies were expected to establish and meet an internal target greater than 150%. Refer to note 45.2 to the Company’s 2021 audited financial statements, for details. IFRS does not prescribe the calculation for the MCCSR, therefore a comparable measure under IFRS is not available.

Forward-Looking Information / Cautionary Statements

Certain information contained in this document may be forward-looking statements within the meaning of Canadian securities laws. Forward-looking statements are often, but not always identified by the use of words such as “expect”, “anticipate”, “believe”, “foresee”, “could”, “estimate”, “goal”, “intend”, “plan”, “seek”, “will”, “may”, “would” and “should” and similar expressions or words suggesting future outcomes. These forward-looking statements reflect material factors and expectations and assumptions of Sagicor. These forward-looking statements include the assumptions: that the transaction is able to be completed on the timelines and on the terms currently anticipated; that all regulatory approvals can be obtained on the timelines and in the manner currently anticipated; that the anticipated benefits of the transaction are able to be achieved; that the businesses of both Sagicor and ivari will continue to operate in a manner consistent with past practice; that the parties’ transition plans are effective; that ivari is able to maintain the same target regulatory capital ratio range post-closing as applies under its current ownership (failing which additional regulatory capital infusions could be required to be made by Sagicor); that no material and mutually agreed management actions out of the ordinary course of business occur at ivari (if they do, then the net benefit to ivari would be shared between Sagicor and the seller and the purchase price would increase accordingly, and the required regulatory capital infusion and/or the purchase price would be less); and that no additional changes to OSFI’s proposed LICAT 2023 regulatory capital regime and/or to IFRS 17 occur before their January 1, 2023 implementation dates. Sagicor’s estimates, beliefs and assumptions are inherently subject to uncertainties and contingencies regarding future events and, as such, are subject to change. Risks and uncertainties not presently known to Sagicor or that it presently believes are not material could cause actual results or events to differ materially from those expressed in its forward-looking statements. Additional information on these and other factors that could affect events and results are included in other documents and reports that will be filed by Sagicor with applicable securities regulatory authorities and may be accessed through the SEDAR website (www.sedar.com). Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect Sagicor’s expectations only as of the date of this document. Sagicor disclaims any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by law.
### Transaction summary

#### Sagicor to Acquire ivari
- **ivari is a leading middle-market individual life insurer in Canada** focused on the universal and term life markets
- Expected purchase price of C$325 million; prior to closing ivari is expected to have additional equity capital injected into the business to meet IFRS 17 and LICAT 2023 standards (reflected in purchase price)

#### Strong Strategic Fit
- **Transformational acquisition, expanding geography and accelerating growth**
- Expands Sagicor's offering of protection and wealth management solutions in Canada
- Positions Sagicor as a leading provider of protection and savings products to the middle-market in North America

#### Financially Attractive
- **Double digit percentage point EPS and BVPS accretion** expected in the first year
- Net assets acquired at a discount to book value
- Transaction internal rate of return well in excess of Sagicor’s targets

#### Financing / Capital
- Expected to be financed largely through new debt and cash on hand
- Up to US$320 million of new debt financing in the form of a 5-year senior secured term loan facility
  - **Maintain strong capital**: MCCSR ratio is expected to improve by over 10 percentage points, debt to capital ratio is expected to remain approximately unchanged

#### Timing
- Expected to close in the next 6 to 12 months
- Subject to receipt of regulatory approvals and satisfaction of customary closing conditions

---
