Sagicor at UWI Science & Technology Week

Port of Spain, Trinidad—Sagicor has a history of investing in our nation’s youth through supporting STEM (science, technology, engineering, and mathematics) initiatives. This is why Sagicor is proud to be a part of the University of the West Indies’ first Science and Technology Week from Monday, May 20, to Friday, May 24, at the Teaching and Learning Complex, St Augustine, at booth 7.

The theme for this science week is Science in Communities and will focus on the research activities of the Faculty of Science and Technology and the relevance of these activities to the development of our Caribbean society.

Attendees will have a chance to gain information on Sagicor products for individual and group health insurance, annuities, mortgages, critical illness, and other investment products by engaging with Sagicor’s financial advisors who will be on hand for this five-day event.

There will be other fun activities and giveaways on the days, so we invite the public to learn how they can make Wise Financial Thinking for Life part of their financial success story.

Sagicor - Science and Technology Week 2019-20: Sagicor advisors engage with visitor at the Sagicor booth during the Faculty of Science and Technology's first Science and Technology Week held at the Teaching and Learning Complex, St Augustine, on May 20.
