Whilst we have taken all reasonable steps to ensure that the information you provide will be kept secure from unauthorized access, the Internet is not a secure environment. We cannot guarantee that the information will be secure during transmission to our web-server.

Sagicor has enhanced the security of certain areas in this web site through the use of secure firewalls and Secure Sockets Layer (SSL) protocol with 126-bit encryption. By using this protocol, all information sent between your computer and our secure environment is encrypted or scrambled and cannot be read by unauthorized persons while in transit. Any information you download from this site is confidential and intended only for the addressee.
