Navigating Insurance Coverage

BY The Sagicor Advisor Posted January 08, 2019 In life insurance

Most people are underinsured. Maybe this is a result of the complexity of insurance products. Many people would rather delay a decision than try to figure it all out on their own. A Sagicor Advisor can help you make wise insurance choices to simplify the decision-making for you.

Your Insurance Advisor Can Help You:

- Know what you need the plan for
- Find out the cost of the plan
- Find out what is covered by your plan
- Find out what is NOT covered by your plan

Be Sure To:
Set yourself a budget of what you can afford to pay monthly for insurance
Ask what the average timing is for legitimate claims
Ask how stable, reliable and efficient is your insurance company.
