

# overview

If you have a fixed income instrument for trade or wish to acquire one, we can help you add existing government and/or corporate bonds to your portfolio.

## **Why do I Need It?**

Fixed Income securities tend to lower your overall risk to your portfolio whilst providing income at regular intervals over the life of the bond.

## **Is This Right for Me?**

Bonds tend to be purchased by older persons who want to avoid volatility in the markets or by persons who have conservative mandates. Fixed income securities can be purchased by anyone.

Give us a call to set up an appointment and discuss your options with our brokers:

## **Equity Trading**

Trading on any Stock Exchange may seem like a daunting task for the new comer to the market or simply for the curious. It does not take a large sum of money to begin investing and our qualified brokers can guide you through the Bull and Bear markets to assist you in achieving your financial goals.

## **Investment Management**

The services of our portfolio managers include personalized assistance for investment solutions, one-on-one meetings with clients and foundations for the Wealth Management divisions, as well as trustee, directorial, and staff sessions for corporate clients. We provide information regarding trends in the global markets and ensure clients are sensitized to the risks and rewards of investing.
