Sagicor

overview

We offer the most diverse range of asset classes and the greatest level of diversification within each asset class, thereby enhancing fund returns while minimizing risk. Sagicor Pooled Funds are comprised of seven asset class specific funds and two balanced funds. They cover all allowable local & international investments in approved jurisdictions. This provides Trustees of Superannuation Funds and members of our Approved Retirement Scheme with the flexibility to choose appropriate investments based on their risk appetite. Returns for the Sagicor Pooled Funds are not guaranteed and will change each month based on the market value of the securities within each Pooled Fund.
