Sagicor

Cover your commercial vehicles with our motor policy. Our coverage includes hired vehicles, taxis, PSVs, company owned vehicles, those used for delivery and more.

A standard car insurance policy covers your car for social, domestic and personal use, which includes everyday driving such as visiting friends, shopping or a day out. However, business vehicle insurance covers you for much more than a standard vehicle insurance policy. With a commercial vehicle insurance policy, you're protected if you travel between different locations for work, drive employees or colleagues around or use your vehicle to commute to any place of work– and anything else that you use the vehicle for on behalf of your business.
