Forward-looking information and non IFRS

Certain information contained in this presentation may be forward-looking statements within the meaning of Canadian securities laws. Forward-looking statements are often, but not always, identified by the use of words such as “expect”, “anticipate”, “believe”, “foresee”, “could”, “estimate”, “goal”, “intend”, “plan”, “seek”, “will”, “may” and “should” and similar expressions or words suggesting future outcomes. These forward-looking statements reflect material factors and expectations and assumptions of Sagicor. Sagicor’s estimates, beliefs and assumptions are inherently subject to uncertainties and contingencies regarding future events and, as such, are subject to change. No assurance can be given that growth or capital optimization will occur or be successful. Risks and uncertainties not presently known to Sagicor or that it presently believes are not material could cause actual results or events to differ materially from those expressed in its forward-looking statements. Additional information on these and other factors that could affect events and results are included in other documents and reports. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect Sagicor expectations only as of the date of this document. Sagicor disclaims any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by law.

The Company reports certain non-IFRS measures that are used to evaluate the performance of its businesses and the performance of their respective segments. As non-IFRS measures generally do not have a standardized meaning, they may not be comparable to similar measures presented by other issuers. Securities regulators require such measures to be clearly defined and reconciled with their most comparable IFRS measure.

The Company references non-IFRS measures and insurance industry metrics in this document and elsewhere. Non-IFRS measures are not recognized measures under IFRS and do not have a standardized meaning prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other companies. Rather, these are provided as additional information to complement those IFRS measures by providing further understanding of the results of the operations of the Company from management’s perspective. Accordingly, these measures should not be considered in isolation, nor as a substitute for analysis of the Company’s financial information reported under IFRS. Non-IFRS measures used to analyze the performance of the Company’s businesses include but are not limited to: underlying net income, return on shareholders’ equity, book value per share, MCCSR, debt to capital ratio, debt to equity ratio, dividend pay-out ratio, and coverage ratio. Please see the “Non-IFRS Financial Information” section of the Management’s Discussion and Analysis for a reconciliation of these non-IFRS measures.

All figures in this presentation are in US$ unless otherwise noted.

Outlook

Key takeaways
COVID-19 continued to bring significant disruption to the regions in which we operated

Q3 2020 was another solid quarter in the context of a difficult operating environment

Net income to shareholders was a loss of $3.0 million
  - Impacted by assumption changes leading to a strengthening of actuarial reserves in our US segment

Total revenue of $402.2 million, -2% Y/Y

Total available capital of $2.1 billion, total debt/capital of 22.6%

Quarterly dividend of US$0.05625
Solid revenue in line with prior year; and good earnings in the context of a difficult operating environment

Total revenue (US$ million)

Sagicor Jamaica

(49% ownership)

1. **#1 market share** in individual and group insurance, and asset management

Offers **investment management and commercial & investment banking** services

2. **2nd largest publicly traded company**
on Jamaica Stock Exchange (JSE: SJ)

   - ~US$1.4 billion market cap
   - SFC stake ~US$650 million

### Q3 2020 Highlights

- **Revenue of $156 million declined 20% Y/Y**
  - Decline in US$ affected by declining J$/US$ exchange rate
  - Total revenue was also impacted by a decline in net premium revenue in the annuity and group health insurance business. The prior year included the sale of a significant annuity plan affecting our Y/Y comparison

- Annual review of actuarial assumptions versus experience resulted in a $19 million net benefit to reserves

- **Net income to shareholders (reflecting our 49%) of $21 million, up 16% from $18 million from the same period in the prior year**

*Capital management*

Outlook

Key takeaways
Sagicor’s credit rating upgraded by S&P to BB+ (Nov. 2020)

Sagicor Upgraded To 'BB+' From 'BB' On Consistently Stronger Capital Adequacy, Outlook Stable

“(S&P Global Ratings) We're upgrading Sagicor group (Sagicor) because we think its capitalization will remain strong in the next few years following the capital injection from its new shareholders after the group completed the business combination transaction with Alignvest in December 2019.

Sagicor’s total adjusted capital has improved, and we expect it to remain above our 'A' benchmark in 2020-2022 despite the hit to earnings this year and the planned acquisition of the CLICO and BAT portfolios. As a result, we're revising the group credit profile (GCP) upward to 'bbb' from 'bbb-'.

Consequently, we raised by one notch to 'BB+' from 'BB' the ratings on non-operating holding company (NOHC) SFC and its financing vehicle SF15. We also raised our issue-level rating on SF15's $320 seven-year senior unsecured notes due 2022 to 'BB+' from 'BB'.

The outlook is stable, which reflects our expectation that the group will maintain its credit fundamentals in the next two years, despite the challenging conditions.”

Business overview

Group results and highlights

Capital management

Outlook

Key takeaways
Solid outlook for 2020 in context of difficult operating environment

- 2020 started with positive momentum after exceeding targets in 2019
  - Q1 results were primarily affected by asset price movements
  - Q2 showed asset price improvements but slower sales due to the pandemic
  - Q3 saw improvements in sales as pandemic lockdown restrictions eased

- Guidance for financial targets are on hold given the length and severity of the pandemic’s impact on the economy is not yet clear

- Sagicor is well capitalized to weather the storm and positioned to continue to grow once economies recover
Significant growth opportunities

- Continue growth in Caribbean markets where Sagicor is a leader and population is under-insured and under-pensioned
- Expand product base in core markets into banking and wealth management
- Continue to grow U.S. business in life and annuities
- Use excess capital for inorganic growth
- Optimize balance sheet
